Essentials of Autopsy Practice: Recent Advances, Topics and Developments

From Brand: Springer

Essentials of Autopsy Practice updates the modern pathologist on issues related to the autopsy. This volume contains topical chapters on the pathology of shock, religious attitudes to death, incised wounds, radiological investigations, metabolic disorders in childhood, maternal deaths, body alterations and piercings which are comprehensive, unique and educational. It brings the literature together into a modern, up-to-date review of the subject, each authored by experts in their field. It comprises the most recent developments in current autopsy practice making the book unique and exceptional - a valuable aid for the bench top, autopsy suite, laboratory or library. A hands-on reference book, Essentials of Autopsy Practice is of interest to both trainees and consultants in all sub-branches of pathology including forensic pathology. It can also be used by non-medical staff involved in the dead, such as nurses, police, lawyers and bereavement officers.

Editorial Review

Review

From the reviews:

"The *Essentials of Autopsy Practice* series is rapidly becoming to autopsies what the *Recent Advances* is to histopathology. ... Overall, this is an excellent book, and a worthy successor to the first volume in the series. It will prove a valuable addition to the bookshelves of all pathologists engaged in autopsy practice." (Julian Burton, ACP News, Spring 2004)

"Throughout, the text is clearly laid out and eminently readable. Despite originating from numerous authors, the book reads well as a whole and is both a fascinating and informative read. Each of the chapters has been generously illustrated with appropriate tables and black and white photographs. ... *Essentials of Autopsy Practice* easily lives up to its title and will make a valuable addition to the bookshelf of any pathologist with an autopsy practice." (Julian Burton, ACP News, Spring 2002)

"All chapters are good reviews of the specific topics, and the range of topics covered includes many of the difficult and contentious issues facing routine practice but which do not have coverage in the major forensic texts. ...[A]n exceptional, compact review worthy of a place in the library of any department still engaged in autopsy examinations. It should be added to the 'must read' list of any trainees considering forensic practice. Even old hands will learn a thing or two, and some may be touched by the insights provided in this book to review their own practices." (Paul Botterill, Pathology, December 2002, 593)

Users Review

From reader reviews:

Javier Link:

In this 21st century, people become competitive in every way. By being competitive now, people have to do something to make these people survive, being in the middle of the particular crowded place and notice simply by surrounding.
