Solved Problems in Quantum and Statistical Mechanics (UNITEXT) By Michele Cini, Francesco Fucito, Mauro Sbragaglia

This textbook is the result of many years of teaching quantum and statistical mechanics, drawing on exercises and exam papers used on courses taught by the authors. The subjects of the exercises have been carefully selected to cover all the material which is most needed by students.

Each exercise is carefully solved in full details, explaining the theory behind the solution with particular care for those issues that students often find difficult, or which are often neglected in other books on the subject. The exercises in this book never require extensive calculations but tend to be somewhat unusual and force the solver to think about the problem starting from first principles, rather than by analogy with some previously solved exercise.

Editorial Review

From the Back Cover

This work arises from our teaching this subject during many years. The vast majority of these exercises are the exams we gave to our students in this period. We carefully selected the subjects of the exercises to cover all the material which is most needed and which is treated in the most well known texts on these subjects. Each exercise is carefully solved in full details, explaining the theory behind the solution with particular care for those issues that, from our experience, are found most difficult from the average student. Indeed, several exercises are designed to throw light on aspects of the theory that, for one reason or another, are usually neglected with the result to make the students feel uneasy about them. In fact most students get acquainted just with the more common manipulations, which are illustrated by many examples in textbooks. Our exercises never require extensive calculations but tend to be somewhat unusual and force the solver to think about the problem starting from the principles, rather than by analogy with some previously solved exercise.

About the Author

Michele Cini is full professor of solid state theory at the Department of Physics, University of Rome Tor Vergata, Italy.

Francesco Fucito is INFN Research Director at the University of Rome Tor Vergata, Italy.

Mauro Sbragaglia is Associate Professor in Theoretical Physics, Mathematical Models and Methods in the Department of Physics at the University of Rome Tor Vergata, Italy.

Users Review

From reader reviews:

Thomas Whitaker:

Book is written, printed, or illustrated for everything. You can realize everything you want by a e-book. Book has a different type. As you may know that book is important issue to bring us around the world. Alongside that you can your reading expertise was fluently. A e-book Solved Problems in Quantum and Statistical Mechanics (UNITEXT) will make you to be smarter. You can feel a lot more confidence if you can know about every thing. But some of you think in which open or reading some sort of book make you bored. It's not make you fun. Why they may be thought like that? Have you in search of best book or suitable book with you?

David Barthel:

Don't be worry in case you are afraid that this book will probably filled the space in your house, you may have it in e-book means, more simple and reachable. This particular Solved Problems in Quantum and

Statistical Mechanics (UNITEXT) can give you a lot of good friends because by you investigating this one book you have matter that they don't and make a person more like an interesting person. This kind of book can be one of a step for you to get success. This guide offer you information that probably your friend doesn't know, by knowing more than some other make you to be great people. So , why hesitate? Let's have Solved Problems in Quantum and Statistical Mechanics (UNITEXT).

Randy Gable:

As we know that book is vital thing to add our knowledge for everything. By a book we can know everything we wish. A book is a list of written, printed, illustrated or blank sheet. Every year ended up being exactly added. This guide Solved Problems in Quantum and Statistical Mechanics (UNITEXT) was filled concerning science. Spend your free time to add your knowledge about your science competence. Some people has diverse feel when they reading the book. If you know how big selling point of a book, you can sense enjoy to read a reserve. In the modern era like at this point, many ways to get book that you wanted.

Willis Harrington:

Book is one of source of information. We can add our information from it. Not only for students but in addition native or citizen require book to know the update information of year to year. As we know those guides have many advantages. Beside most of us add our knowledge, also can bring us to around the world. From the book Solved Problems in Quantum and Statistical Mechanics (UNITEXT) we can get more advantage. Don't someone to be creative people? Being creative person must prefer to read a book. Merely choose the best book that ideal with your aim. Don't end up being doubt to change your life with this book Solved Problems in Quantum and Statistical Mechanics (UNITEXT). You can more attractive than now.
