In the year 2170, Leanna attends a school in Missouri that allows her to experience different time periods in history by virtually being there. Little does she know that she will soon be caught in a terrifying adventure, not unlike the slaves' escape from barking hounds en route to Canada through the Underground Railroad that she just experienced in class. When Leanna's mother is arrested for treason against the government, Leanna learns she is not a "First," an original biological being. She is a clone in a society that enslaves and abuses them and must rely on the assistance of characters both living and historical to survive. The McKissacks' slight story for younger readers packs a great deal of messaging, which will no doubt prove useful in classroom discussions of issues and themes but sometimes comes at the expense of the story. The science-fiction backdrop serves as a framework for issues of identity and societal prejudice but is not predominant in the reading experience. Grades 4-7. --Holly Koelling
