The Universe: Leading Scientists Explore the Origin, Mysteries, and Future of the Cosmos (Best of Edge Series) By John Brockman

John Brockman brings together the world's best-known physicists and science writers—including Brian Greene, Walter Isaacson, Nobel Prize-winner Frank Wilczek, Benoit Mandelbrot, and Martin Rees—to explain the universe in all wondrous splendor.

In *The Universe*, today's most influential science writers explain the science behind our evolving understanding of the universe and everything in it, including the cutting edge research and discoveries that are shaping our knowledge.

Lee Smolin reveals how math and cosmology are helping us create a theory of the whole universe. Benoit Mandelbrot looks back on a career devoted to fractal geometry. Neil Turok analyzes the fundamental laws of nature, what came before the big bang, and the possibility of a unified theory.

Seth Lloyd investigates the impact of computational revolutions and the informational revolution. Lawrence Krauss provides fresh insight into gravity, dark matter, and the energy of empty space. Brian Greene and Walter Isaacson illuminate the genius who revolutionized modern science: Albert Einstein. And much more.

Explore the universe with some of today's greatest minds: what it is, how it came into being, and what may happen next.

Editorial Review

Review

“Illuminating, mind-expanding. ... A spectacular, mind-bending read. ” (Brain Pickings)

From the Back Cover

Explore the universe with today's greatest physicists.

In the wake of one of the most groundbreaking scientific breakthroughs in modern times, the March 2014 discovery of gravitational ripples from the Big Bang—an apparent confirmation of Alan Guth and Andrei Linde's theory of cosmic inflation—John Brockman of Edge.org has gathered together some of the world's best minds to explain the universe as we currently know it. The contributors—many pioneering theoretical physicists and cosmologists, including Guth and Linde—provide an extraordinary picture of cosmology as it has developed over the past three decades.

- Alan Guth and Andrei Linde explain the Inflationary Universe theory.
- Lee Smolin discusses the nature of time.
- Lisa Randall and Neil Turok elaborate on the theory of branes, two-dimensional structures arising from string theory—whose existence is central to the cyclic universe.
- Seth Lloyd investigates how the universe behaves like a self-programming computer.
- Lawrence Krauss provides fresh insight into gravity, dark matter, and the energy of empty space.
- Brian Greene and Einstein biographer Walter Isaacson speculate on how Albert Einstein might view the theoretical physics of the twenty-first century.
- The late Benoit Mandelbrot looks back on a long career devoted to fractal geometry.
- Plus Nobel Prize winner Frank Wilczek, Astronomer Royal MaRTin Rees, Caltech physicist Sean Carroll, Stanford's Leonard Susskind, Oxford's David Deutsch, Cornell's Steven Strogatz, Albert Einstein Professor in Science at Princeton Paul Steinhardt, and more!

About the Author

The publisher of the online science salon Edge.org, John Brockman is the editor of *Know This, This Idea Must Die, This Explains Everything, This Will Make You Smarter*, and other volumes.

Users Review

From reader reviews:

Mary Hopkins:

In this 21st centuries, people become competitive in every way. By being competitive right now, people have do something to make all of them survives, being in the middle of the actual crowded place and notice simply by surrounding. One thing that oftentimes many people have underestimated it for a while is reading. Sure, by reading a reserve your ability to survive boost then having chance to stand than other is high. For you who want to start reading the book, we give you this specific The Universe: Leading Scientists Explore the Origin, Mysteries, and Future of the Cosmos (Best of Edge Series) book as nice and daily reading e-

book. Why, because this book is usually more than just a book.

Patricia Bush:

As people who live in the actual modest era should be up-date about what going on or information even knowledge to make these individuals keep up with the era that is always change and move ahead. Some of you maybe will certainly update themselves by examining books. It is a good choice to suit your needs but the problems coming to anyone is you don't know which you should start with. This The Universe: Leading Scientists Explore the Origin, Mysteries, and Future of the Cosmos (Best of Edge Series) is our recommendation to help you keep up with the world. Why, because book serves what you want and need in this era.

Robert Maas:

Spent a free the perfect time to be fun activity to accomplish! A lot of people spent their free time with their family, or their friends. Usually they carrying out activity like watching television, going to beach, or picnic inside park. They actually doing ditto every week. Do you feel it? Do you want to something different to fill your own personal free time/ holiday? Could be reading a book can be option to fill your cost-free time/ holiday. The first thing that you will ask may be what kinds of publication that you should read. If you want to test look for book, may be the book untitled The Universe: Leading Scientists Explore the Origin, Mysteries, and Future of the Cosmos (Best of Edge Series) can be excellent book to read. May be it may be best activity to you.

Kathleen Sinclair:

Some individuals said that they feel bored when they reading a guide. They are directly felt that when they get a half regions of the book. You can choose the book The Universe: Leading Scientists Explore the Origin, Mysteries, and Future of the Cosmos (Best of Edge Series) to make your own reading is interesting. Your personal skill of reading ability is developing when you like reading. Try to choose very simple book to make you enjoy you just read it and mingle the opinion about book and reading especially. It is to be 1st opinion for you to like to available a book and learn it. Beside that the book The Universe: Leading Scientists Explore the Origin, Mysteries, and Future of the Cosmos (Best of Edge Series) can to be a newly purchased friend when you're feel alone and confuse in doing what must you're doing of that time.
