
Nanotechnology and Neuroscience: Nano-electronic, Photonic and Mechanical Neuronal Interfacing

From Springer

Nanotechnology and Neuroscience: Nano-electronic, Photonic and Mechanical Neuronal Interfacing From Springer

This book describes the use of modern micro- and nanofabrication technologies to develop improved tools for stimulating and recording electrical activity in neuronal networks. It provides an overview of the different ways in which the “nano-world” can be beneficial for neuroscientists, including improvement of mechanical adhesion of cells on electrodes, tight-sealed extracellular recordings or intracellular approaches with strongly reduced invasiveness and tools for localized electrical or optical stimulation in optogenetics experiments. Specific discussion of fabrication strategies is included, to provide a comprehensive guide to develop micro and nanostructured tools for biological applications. A perspective on integrating these devices with state-of-the-art technologies for large-scale in vitro and in vivo experiments completes the picture of neuronal interfacing with micro- and nanostructures.

Editorial Review

From the Back Cover

This book provides an overview of the different ways in which the “nano-world” can be beneficial for neuroscientists. The volume encompasses the latest developments in the field of micro- and nanotechnology applied to neuroscience, discussing technological approaches applied to both in-vitro and in-vivo experiments. A variety of different nanotechnologies are presented that include nanostructured electrodes and their electrical, mechanical and biochemical properties, active and passive 2D and 3D multi-electrode arrays (MEAs), nanoscale transistors for sub-cellular re-cordings and an overview on methods, tools and applications in optoge-netics.

The book focuses specifically on fabrication strategies, to offer a compre-hensive guide for developing and applying micro- and nanostructured tools for neuroscientific applications. It is intended as a reference both for neuroscientists and nanotechnologists on the latest developments in neu-rotechnological tools.

• Provides readers with state-of-the-art information about developing advanced nanotechnology tools for communicating with the brain;
• Includes discussion of the compatibility of fabrication techniques optimized for different target devices, such as electric sensors/transducers based on metallic or semiconductor interfaces and optical probes to guide light into the brain;
• Offers a single-source reference to the mechanical, electrical and optical effects of nanostructures on neurons.

Users Review

From reader reviews:

Anthony Chan:

With other case, little folks like to read book Nanotechnology and Neuroscience: Nano-electronic, Photonic and Mechanical Neuronal Interfacing. You can choose the best book if you'd prefer reading a book. Providing we know about how is important a new book Nanotechnology and Neuroscience: Nano-electronic, Photonic and Mechanical Neuronal Interfacing. You can add understanding and of course you can around the world by a book. Absolutely right, because from book you can realize everything! From your country until eventually foreign or abroad you can be known. About simple matter until wonderful thing you are able to know that. In this era, we can open a book or maybe searching by internet product. It is called e-book. You should use it when you feel uninterested to go to the library. Let's examine.

Ellen Omalley:

The event that you get from Nanotechnology and Neuroscience: Nano-electronic, Photonic and Mechanical Neuronal Interfacing will be the more deep you digging the information that hide inside words the more you get interested in reading it. It doesn't mean that this book is hard to comprehend but Nanotechnology and Neuroscience: Nano-electronic, Photonic and Mechanical Neuronal Interfacing giving you buzz feeling of reading. The writer conveys their point in particular way that can be understood through anyone who read the idea because the author of this publication is well-known enough. This specific book also makes your own personal vocabulary increase well. So it is easy to understand then can go along with you, both in printed or e-book style are available. We recommend you for having this kind of Nanotechnology and Neuroscience: Nano-electronic, Photonic and Mechanical Neuronal Interfacing instantly.

James Babb:

Are you kind of busy person, only have 10 or even 15 minute in your time to upgrading your mind proficiency or thinking skill also analytical thinking? Then you are having problem with the book compared to can satisfy your short space of time to read it because pretty much everything time you only find e-book that need more time to be examine. Nanotechnology and Neuroscience: Nano-electronic, Photonic and Mechanical Neuronal Interfacing can be your answer since it can be read by a person who have those short time problems.

Patsy Locke:

Don't be worry if you are afraid that this book will probably filled the space in your house, you can have it in e-book means, more simple and reachable. This kind of Nanotechnology and Neuroscience: Nano-electronic, Photonic and Mechanical Neuronal Interfacing can give you a lot of close friends because by you taking a look at this one book you have factor that they don't and make you more like an interesting person. That book can be one of one step for you to get success. This reserve offer you information that probably your friend doesn't understand, by knowing more than some other make you to be great men and women. So , why hesitate? Let's have Nanotechnology and Neuroscience: Nano-electronic, Photonic and Mechanical Neuronal Interfacing.

Read Nanotechnology and Neuroscience: Nano-electronic, Photonic and Mechanical Neuronal Interfacing From Springer for online ebook

Nanotechnology and Neuroscience: Nano-electronic, Photonic and Mechanical Neuronal Interfacing From Springer Free PDF d0wnl0ad, audio books, books to read, good books to read, cheap books, good books, online books, books online, book reviews epub, read books online, books to read online, online library, greatbooks to read, PDF best books to read, top books to read Nanotechnology and Neuroscience: Nano-electronic, Photonic and Mechanical Neuronal Interfacing From Springer books to read online.
