Energy Trading and Investing: Trading, Risk Management and Structuring Deals in the Energy Market By Davis W. Edwards

“The essential training manual for anyone who expects to profitably engage the energy market while avoiding the devils lurking in the details.”

Kurt Yeager, former President and CEO of the Electric Power Research Institute and coauthor of *Perfect Power*

Shrinking fossil fuel supplies, volatile prices, deregulation, and environmental conservation have transformed the energy market into a major arena for making money. In response, an unprecedented amount of capital and investment manpower has flooded into the energy market. Older utilities are finding that their quiet, safe business has changed dramatically in a short period of time.

Now, *Energy Trading and Investing* provides a big-picture introduction to the industry along with the trading know-how and financial details that every market participant needs for success.

This hands-on guidebook covers all types of energy markets?from the big-three markets of electricity, natural gas, and oil to the growing markets for liquefied natural gas, emissions, and alternative energy. It provides useful information on the interdependence of the different energy markets, who the major players are, and how Wall Street trades energy products.

Energy Trading and Investing features:

- An overview of the entire energy market
- In-depth descriptions of all of the major energy commodities
- Financially oriented discussions of how chemistry, physics, accounting, and option pricing affect trading
- Primers on load forecasting, tolling agreements, natural gas storage, and more
- A practical introduction to risk management

Written by a pioneering quant in the energy market, *Energy Trading and Investing* provides a highly disciplined and organized approach to profiting from energy investments. This potent combination of detailed, up-to-date information alongside expert know-how thoroughly prepares you to invest and trade with confidence in the energy market.

If you're a serious trader, you need to understand the energy markets, and *Energy Trading and Investing* is the only book you need to trade successfully in this growing sector.

Editorial Review

From the Back Cover

How to profit in one of today's fastest-growing financial markets!

With diminishing fossil fuel supplies and the growing specter of environmental change, governments are using the free market to minimize the cost of adopting sustainable energy policies. This makes energy one of the few markets that is rapidly expanding, and it is now one of the hottest investment opportunities in the world.

Energy Trading and Investing offers a comprehensive and practical introduction to energy trading?from the big picture of how different products are related to each other to in-depth explanations of the jargon and financial mathematics that trip up new traders.

Energy Trading and Investing features:

- A detailed introduction to each of the major energy markets: electricity, natural gas, petroleum, coal, and emissions
- Primers on advanced topics like storage, wheeling, load forecasting, and pipeline transportation
- Examples of ways to invest in wind power, carbon emissions, thermal solar power, and other new markets

About the Author

Davis W. Edwards is a managing director at Macquarie Group and is responsible for managing the credit risks of its North American energy investments. Macquarie, Australia's preeminent financial conglomerate, is one of the largest energy companies in North America through its subsidiary, Macquarie Cook Energy. Previously, Davis headed the Mathematical Arbitrage Trading Desk at Bear Stearns. With several billion in capital and operated like a private hedge fund, the Mathematical Arbitrage Trading Desk handled Bear Stearns's proprietary investments in the equities, energy, commodities, and option markets.
