Linear Algebra (Dover Books on Mathematics) By Georgi E. Shilov

Get Print Book

In this volume in his exceptional series of translations of Russian mathematical texts, Richard Silverman has taken Shilov's course in linear algebra and has made it even more accessible and more useful for English language readers.

Georgi E. Shilov, Professor of Mathematics at the Moscow State University, covers determinants, linear spaces, systems of linear equations, linear functions of a vector argument, coordinate transformations, the canonical form of the matrix of a linear operator, bilinear and quadratic forms, Euclidean spaces, unitary spaces, quadratic forms in Euclidean and unitary spaces, finite-dimensional algebras and their representations, with an appendix on categories of finite-dimensional spaces.

The author begins with elementary material and goes easily into the advanced areas, covering all the standard topics of an advanced undergraduate or beginning graduate course. The material is presented in a consistently clear style. Problems are included, with a full section of hints and answers in the back.

Keeping in mind the unity of algebra, geometry and analysis in his approach, and writing practically for the student who needs to learn techniques, Professor Shilov has produced one of the best expositions on the subject. Because it contains an abundance of problems and examples, the book will be useful for self-study as well as for the classroom.

Users Review

From reader reviews:

Michelle Porter:

Beside that Linear Algebra (Dover Books on Mathematics) in your phone, it can give you a way to get more close to the new knowledge or details. The information and the knowledge you will got here is fresh from the oven so don't be worry if you feel like an old people live in narrow small town. It is good thing to have Linear Algebra (Dover Books on Mathematics) because this book offers to you personally readable information. Do you at times have book but you would not get what it's about. Oh come on, that will not end up to happen if you have this in the hand. The Enjoyable arrangement here cannot be questionable, just like treasuring beautiful island. Techniques you still want to miss the item? Find this book as well as read it from at this point!

Jamey Norton:

That publication can make you to feel relax. This book Linear Algebra (Dover Books on Mathematics) was multi-colored and of course has pictures on the website. As we know that book Linear Algebra (Dover Books on Mathematics) has many kinds or style. Start from kids until teenagers. For example Naruto or Private investigator Conan you can read and think you are the character on there. So , not at all of book are generally make you bored, any it offers you feel happy, fun and loosen up. Try to choose the best book for you personally and try to like reading that.

James Harris:

As a college student exactly feel bored to be able to reading. If their teacher inquired them to go to the library as well as to make summary for some book, they are complained. Just tiny students that has reading's spirit or real their hobby. They just do what the professor want, like asked to the library. They go to there but nothing reading really. Any students feel that studying is not important, boring in addition to can't see colorful images on there. Yeah, it is being complicated. Book is very important for you. As we know that on this period, many ways to get whatever we really wish for. Likewise word says, many ways to reach Chinese's country. So , this Linear Algebra (Dover Books on Mathematics) can make you feel more interested to read.

Tammie Torres:

Reading a e-book make you to get more knowledge from this. You can take knowledge and information coming from a book. Book is composed or printed or descriptive from each source in which filled update of news. On this modern era like at this point, many ways to get information are available for anyone. From media social just like newspaper, magazines, science e-book, encyclopedia, reference book, story and comic. You can add your knowledge by that book. Do you want to spend your spare time to spread out your book? Or just trying to find the Linear Algebra (Dover Books on Mathematics) when you desired it?
