Handbook of Photomask Manufacturing Technology From CRC Press

As the semiconductor industry attempts to increase the number of functions that will fit into the smallest space on a chip, it becomes increasingly important for new technologies to keep pace with these demands. Photomask technology is one of the key areas to achieving this goal. Although brief overviews of photomask technology exist in the literature, the Handbook of Photomask Manufacturing Technology is the first in-depth, comprehensive treatment of existing and emerging photomask technologies available.

The Handbook of Photomask Manufacturing Technology features contributions from 40 internationally prominent authors from industry, academia, government, national labs, and consortia. These authors discuss conventional masks and their supporting technologies, as well as next-generation, non-optical technologies such as extreme ultraviolet, electron projection, ion projection, and x-ray lithography. The book begins with an overview of the history of photomask development. It then demonstrates the steps involved in designing, producing, testing, inspecting, and repairing photomasks, following the sequences observed in actual production. The text also includes sections on materials used as well as modeling and simulation.

Continued refinements in the photomask-making process have ushered in the sub-wavelength era in nanolithography. This invaluable handbook synthesizes these refinements and provides the tools and possibilities necessary to reach the next generation of microfabrication technologies.

Editorial Review

Users Review

From reader reviews:

Michael Gibson:

What do you concerning book? It is not important with you? Or just adding material if you want something to explain what yours problem? How about your spare time? Or are you busy individual? If you don't have spare time to accomplish others business, it is make you feel bored faster. And you have spare time? What did you do? Everybody has many questions above. They have to answer that question due to the fact just their can do which. It said that about book. Book is familiar in each person. Yes, it is appropriate. Because start from on kindergarten until university need this specific Handbook of Photomask Manufacturing Technology to read.

Ana Jara:

A lot of people always spent their particular free time to vacation or even go to the outside with them loved ones or their friend. Were you aware? Many a lot of people spent many people free time just watching TV, or even playing video games all day long. If you wish to try to find a new activity honestly, that is look different you can read a book. It is really fun for you. If you enjoy the book which you read you can spent all day long to reading a reserve. The book Handbook of Photomask Manufacturing Technology it is rather good to read. There are a lot of people who recommended this book. These folks were enjoying reading this book. In case you did not have enough space to deliver this book you can buy the particular e-book. You can m0ore quickly to read this book from the smart phone. The price is not to fund but this book possesses high quality.

Bryant Kelly:

Beside this specific Handbook of Photomask Manufacturing Technology in your phone, it may give you a way to get closer to the new knowledge or details. The information and the knowledge you are going to got here is fresh through the oven so don't possibly be worry if you feel like an previous people live in narrow town. It is good thing to have Handbook of Photomask Manufacturing Technology because this book offers to your account readable information. Do you oftentimes have book but you do not get what it's exactly about. Oh come on, that will not happen if you have this with your hand. The Enjoyable option here cannot be questionable, like treasuring beautiful island. Use you still want to miss the item? Find this book along with read it from currently!

Bruce Hardin:

As a pupil exactly feel bored to be able to reading. If their teacher expected them to go to the library or make summary for some e-book, they are complained. Just very little students that has reading's heart or real their passion. They just do what the teacher want, like asked to the library. They go to generally there but nothing reading seriously. Any students feel that reading is not important, boring and can't see colorful photographs on there. Yeah, it is to be complicated. Book is very important for yourself. As we know that on this era, many ways to get whatever you want. Likewise word says, ways to reach Chinese's country. Therefore this Handbook of Photomask Manufacturing Technology can make you experience more interested to read.
