Programming Web Services with Perl By Randy J. Ray, Pavel Kulchenko

Given Perl's natural fit for web applications development, it's no surprise that Perl is also a natural choice for web services development. It's the most popular web programming language, with strong implementations of both SOAP and XML-RPC, the leading ways to distribute applications using web services. But books on web services focus on writing these applications in Java or Visual Basic, leaving Perl programmers with few resources to get them started. *Programming Web Services with Perl* changes that, bringing Perl users all the information they need to create web services using their favorite language. *Programming Web Services with Perl* steers clear of the hype surrounding web services and concentrates on what is useful and practical. The book introduces the major web services standards, such as XML-RPC, SOAP, WSDL, and UDDI, and shows how to implement Perl servers and clients using these standards. You'll find detailed references on both the XML and SOAP toolkits, and learn when to use one technology in favor of the other. The book is rich with programming examples that you'll find useful well past the learning stage. And, moving beyond the basics, the book offers solutions to problems of security, authentication, and scalability. Some of the topics covered in the book are:

- HTTP and XML basics
- XML-RPC and the toolkits
- SOAP and toolkits
- SOAP::Lite
- Using SOAP with SMTP and other protocols
- Advertising and discovering with UDDI and WSDL
- The REST methodology
- The future of web services

Programming Web Services with Perl was written for Perl programmers who have no prior knowledge of web services. You can pick up this book without any understanding of XML-RPC or SOAP and be able to apply these technologies easily, through the use of publicly available Perl modules detailed in the book. If you're interested in applying XML-RPC and SOAP technologies to distributed programming applications, then *Programming Web Services with Perl* is a book you'll want to have.

Editorial Review

Users Review

From reader reviews:

Jean Fuller:

Do you have favorite book? If you have, what is your favorite's book? Guide is very important thing for us to know everything in the world. Each book has different aim as well as goal; it means that reserve has different type. Some people experience enjoy to spend their time and energy to read a book. They can be reading whatever they have because their hobby is reading a book. What about the person who don't like reading a book? Sometime, particular person feel need book after they found difficult problem or perhaps exercise. Well, probably you will need this Programming Web Services with Perl.

Malcolm Khan:

This book untitled Programming Web Services with Perl to be one of several books which best seller in this year, that's because when you read this publication you can get a lot of benefit in it. You will easily to buy this particular book in the book shop or you can order it through online. The publisher of this book sells the e-book too. It makes you more easily to read this book, as you can read this book in your Smartphone. So there is no reason to you to past this reserve from your list.

Gregory Howard:

Beside this Programming Web Services with Perl in your phone, it could possibly give you a way to get nearer to the new knowledge or details. The information and the knowledge you may got here is fresh from oven so don't end up being worry if you feel like an outdated people live in narrow small town. It is good thing to have Programming Web Services with Perl because this book offers for your requirements readable information. Do you at times have book but you rarely get what it's interesting features of. Oh come on, that will not end up to happen if you have this inside your hand. The Enjoyable blend here cannot be questionable, like treasuring beautiful island. So do you still want to miss it? Find this book along with read it from now!

William Holmes:

As a scholar exactly feel bored to reading. If their teacher questioned them to go to the library or make summary for some reserve, they are complained. Just minor students that has reading's internal or real their pastime. They just do what the educator want, like asked to the library. They go to generally there but nothing reading very seriously. Any students feel that studying is not important, boring in addition to can't see colorful photos on there. Yeah, it is being complicated. Book is very important in your case. As we know

that on this era, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country. Therefore this Programming Web Services with Perl can make you feel more interested to read.
