Landscapes and Landforms of Ethiopia (World Geomorphological Landscapes) From Springer

This book provides a succinct but comprehensive presentation of key geomorphological locations and topics including information about geomorphological heritage and maps to visit the most important sites.

Apart from often being remarkably scenic, landscapes reveal stories that often can be traced back in time tens of million years and include unique events. This is particularly true for Ethiopia where spectacular examples of different landforms are present. Its geomorphology varies from highlands, marked by high volcanoes and incised by deep river gorges, to the rift valley lakes endorheic systems and the below sea level lowlands with characteristic landscapes which are unique in the world. Landscapes and Landforms of Ethiopia highlights all these topics including essential information about geology and tectonic framework, past and present climate, hydrology, geographical regions and long-term geomorphological history. It is a highly informative book, providing insight for readers with an interest in geography and geomorphology.

Editorial Review

Review

“This book undertakes a comprehensive treatment of the geomorphology of this diverse and fascinating country and succeeds reasonably well. Its greatest strength lies in the first five chapters (about one quarter of the book), which provide a solid overview of the area, including physical and historical geomorphology, geology, climate, and rivers. These will be of great use to anyone needing an introduction to or reference materials on the country. ... Summing Up: Recommended. Lower-division undergraduates through professionals/practitioners.” (I. D. Sasowsky, *Choice*, Vol. 53 (2), October, 2015)

From the Back Cover

This book provides a succinct but comprehensive presentation of key geomorphological locations and topics including information about geomorphological heritage and maps to visit the most important sites.

Apart from often being remarkably scenic, landscapes reveal stories that often can be traced back in time tens of million years and include unique events. This is particularly true for Ethiopia where spectacular examples of different landforms are present. Its geomorphology varies from highlands, marked by high volcanoes and incised by deep river gorges, to the rift valley lakes endorheic systems and the below sea level lowlands with characteristic landscapes which are unique in the world. *Landscapes and Landforms of Ethiopia* highlights all these topics including essential information about geology and tectonic framework, past and present climate, hydrology, geographical regions and long-term geomorphological history. It is a highly informative book, providing insight for readers with an interest in geography and geomorphology.

About the Author

Paolo Billi is a Professor of Fluvial Dynamics and Geomorphology in the Department of Earth Sciences at the University of Ferrara in Italy. His research interests include river geomorphology, including specific topics such as river hydrology, sediment transport, river channel processes, sediment yield, gully erosion and soil erosion processes. Furthermore, he is interested in climatic change worldwide. Specific topics he investigates are human impact on rivers, desertification processes, land degradation, climate change and river response and water resources conservation.

Prof. Paolo Billi has been carrying out field and laboratory studies on these topics in Italy, in Europe and since 1983, throughout the whole Horn of Africa in Somalia, Ethiopia, Sudan and Eritrea. He is author of more than 170 papers in national and international journals.

Users Review

From reader reviews:

Janice Martin:

What do you think of book? It is just for students as they are still students or the item for all people in the

world, the particular best subject for that? Simply you can be answered for that issue above. Every person has different personality and hobby for each other. Don't to be obligated someone or something that they don't need do that. You must know how great and also important the book Landscapes and Landforms of Ethiopia (World Geomorphological Landscapes). All type of book can you see on many options. You can look for the internet sources or other social media.

Dolores Schreiber:

Reading a book can be one of a lot of activity that everyone in the world likes. Do you like reading book and so. There are a lot of reasons why people enjoyed. First reading a reserve will give you a lot of new info. When you read a reserve you will get new information simply because book is one of numerous ways to share the information or their idea. Second, examining a book will make an individual more imaginative. When you reading through a book especially tale fantasy book the author will bring one to imagine the story how the figures do it anything. Third, you can share your knowledge to other individuals. When you read this Landscapes and Landforms of Ethiopia (World Geomorphological Landscapes), you may tells your family, friends in addition to soon about yours e-book. Your knowledge can inspire average, make them reading a e-book.

Bernetta Smith:

Do you have something that you enjoy such as book? The publication lovers usually prefer to decide on book like comic, brief story and the biggest an example may be novel. Now, why not seeking Landscapes and Landforms of Ethiopia (World Geomorphological Landscapes) that give your enjoyment preference will be satisfied by reading this book. Reading routine all over the world can be said as the way for people to know world considerably better then how they react when it comes to the world. It can't be claimed constantly that reading routine only for the geeky individual but for all of you who wants to become success person. So , for all of you who want to start reading through as your good habit, it is possible to pick Landscapes and Landforms of Ethiopia (World Geomorphological Landscapes) become your current starter.

Harvey Lee:

This Landscapes and Landforms of Ethiopia (World Geomorphological Landscapes) is brand new way for you who has fascination to look for some information because it relief your hunger associated with. Getting deeper you on it getting knowledge more you know or perhaps you who still having little digest in reading this Landscapes and Landforms of Ethiopia (World Geomorphological Landscapes) can be the light food for you personally because the information inside this particular book is easy to get by anyone.
