The Handbook of Environmental Policy Evaluation By Ann Crabb, Pieter Leroy

Policy evaluation is an important and well-established part of the policy process, facilitating and feeding back to promote the ongoing effectiveness of policies that have been implemented or anticipating policies in the making. Environmental policy is a special case, presenting new complexities uncommon to other areas, which standard evaluation tools are ill-equipped to grapple with. It is also an area that is experiencing rapid growth throughout the world and knowledge is now needed at all levels of government and in NGOs, businesses and other organizations, all of whom are required to assess the effectiveness of their policies. This handbook is the first guide to environmental policy evaluation in practice. Beginning with an introduction to the general principles of evaluation, it explains the particular complexities native to the environmental sphere and provides a comprehensive toolkit of evaluation methods and techniques which the practitioner can employ and refer to again and again. The authors also consider design issues which may face the policy evaluator, including involvement of stakeholders, the sensitivities between them, the a priori assessment of the evaluability of a field, the maximization of the utilization of the evaluations? outcomes, and much more. Throughout, the theory is illustrated with practical examples from around the world, making this the essential companion guide for anyone tasked with ensuring that environmental policy fulfils its aims and achieves its potential.

Editorial Review

Review

'The broadening field of environmental policy is in great need of evaluation and this handbook will be a most welcome, timely and useful tool for this mission.' Evert Vedung, professor emeritus of political science, Uppsala University 'The Handbook of environmental policy evaluation is the first guide to evaluation in this field and provides a comprehensive toolkit for any practitioner involved in environmental policy planning and implementation. With regular illustrations drawn from practical answers throughout the world, this is an excellent guide for success in this tricky area.' The Environmentalist

Timothy Rhine:

As a student exactly feel bored to be able to reading. If their teacher inquired them to go to the library or make summary for some e-book, they are complained. Just small students that has reading's spirit or real their interest. They just do what the teacher want, like asked to the library. They go to generally there but nothing reading significantly. Any students feel that studying is not important, boring and can't see colorful pictures on there. Yeah, it is for being complicated. Book is very important in your case. As we know that on this time, many ways to get whatever we would like. Likewise word says, many ways to reach Chinese's country. So , this The Handbook of Environmental Policy Evaluation can make you sense more interested to read.
