Environmental Science By Daniel D. Chiras

Designed for the undergraduate, introductory environmental science course, the thoroughly updated and redesigned tenth edition of Environmental Science continues to present a comprehensive, student-friendly introduction to contemporary environmental issues with an emphasis on sustainable solutions that meet social, economic, and environmental goals. This acclaimed book is the only text that explores the underlying causes of environmental problems and root-level solutions and presents both sides of many critical issues. Thought-provoking features throughout, including Critical Thinking Exercises, Key Concept and Spotlight on Sustainability boxes, Go Green tips, and Point/Counterpoint debates, along with the updated statistics and data of key issues, encourage readers to become much deeper and more critical thinkers. Current and highly relevant, the Tenth Edition discusses the challenges of the growing human population and resource depletion and solutions that address these issues in a sustainable manner. The book also discusses nonrenewable and renewable energy options and their pros and cons, and provides expanded coverage of local, regional, national, and global environmental issues and sustainable solutions. This comprehensive text includes updated coverage of environmental economics, ecology, and the application of science and technology to environmental concerns. With a strong focus on sustainability and critical thinking, a topic the author introduced to the environmental science market, Environmental Science, Tenth Edition is an essential resource for students to understand the impact they have on the environment and ways that they can help solve them. Each new print copy includes Navigate 2 Advantage Access that unlocks a comprehensive and interactive eBook, student practice activities and assessments, a full suite of instructor resources, and learning analytics reporting tools.

Editorial Review

Users Review

From reader reviews:

Harry Branham:

What do you think of book? It is just for students because they are still students or it for all people in the world, exactly what the best subject for that? Simply you can be answered for that concern above. Every person has various personality and hobby for each other. Don't to be pressured someone or something that they don't want do that. You must know how great and important the book Environmental Science. All type of book would you see on many sources. You can look for the internet methods or other social media.

Hazel Makowski:

Here thing why this Environmental Science are different and trusted to be yours. First of all looking at a book is good but it depends in the content from it which is the content is as delightful as food or not. Environmental Science giving you information deeper and different ways, you can find any publication out there but there is no guide that similar with Environmental Science. It gives you thrill looking at journey, its open up your current eyes about the thing that happened in the world which is possibly can be happened around you. You can bring everywhere like in recreation area, café, or even in your means home by train. In case you are having difficulties in bringing the published book maybe the form of Environmental Science in e-book can be your alternative.

Maria Clyburn:

Playing with family in a park, coming to see the ocean world or hanging out with buddies is thing that usually you will have done when you have spare time, and then why you don't try factor that really opposite from that. One activity that make you not feeling tired but still relaxing, trilling like on roller coaster you already been ride on and with addition associated with. Even you love Environmental Science, you can enjoy both. It is good combination right, you still would like to miss it? What kind of hang-out type is it? Oh can occur its mind hangout people. What? Still don't obtain it, oh come on its known as reading friends.

April Brooks:

Reading a book make you to get more knowledge from that. You can take knowledge and information from your book. Book is prepared or printed or outlined from each source that will filled update of news. In this modern era like now, many ways to get information are available for an individual. From media social just like newspaper, magazines, science book, encyclopedia, reference book, fresh and comic. You can add your understanding by that book. Isn't it time to spend your spare time to open your book? Or just trying to find the Environmental Science when you required it?
